# CATALOGUE.

N.B. The Numbers 1 to 24 represent the 24 Linnean Classes (see Column 1st), whereas those indicating the Linnean Orders (2nd Column) and the Natural Orders (3rd Column) are arbitrary; their signification is given above (see Page 3rd). Example, Campanula, 5, 25, 73, belongs to the 5th Linnean Class, *Pentandria*, the flower having 5 Stamens; to the Linnean Order *Monogynia*, from its having 1 Style (Pistillum); and to the Natural Order *Campanulaceæ*, plants with Bell-shaped Flowers. See page 8.

## MISCELLANEOUS FLOWER SEEDS.

The following Plants, with few exceptions, have no popular name; thus *Ageratum mexicanum* is rendered Mexican Ageratum, &c.—In giving orders it is sufficient to mention the numbers and date of the Catalogue, 1847.
